

Engineering Specifications for Co-Extruded Trim-Seal

Description:	Co-Extruded Trim-Seal is a flexible dense rubber trim and a sponge rubber bulb combined into one part that gives long-life protection against moisture, noise and rattles and provides a secure seal for a variety of applications.
Resistance to:	Ozone – Good to Excellent Water Absorption – Excellent Sunlight Aging – Good to Excellent Low Temperature – Excellent
General Temperature Range:	-40F to +212F
Bulb Material:	EPDM Sponge, Medium-Firm Density.
Base Material:	70 Shore A Dense EPDM
Internal Carrier:	Flexible Aluminum Wire or Stamped Steel
Flammability and Code Compliance:	FMVSS 302
